#### **TECHNICAL EXPERIENCE**

#### **Co-creator; Software Engineer,** *Firefly* $\square$

October 2022 – December 2022

Firefly is an open-source observability framework, providing an overview of serverless function health through the use of metrics and traces.

- Prototyped and built Firefly using Node.js, OpenTelemetry and Amazon Web Services (Lambda, Metric Stream, Firehose, S3, IAM).
- Created a CLI to automatically instrument Lambda functions and setup AWS infrastructure to emit metrics from CloudWatch and published as an NPM package.
- Automated AWS infrastructure setup and teardown through the use of the AWS SDK and Terraform.
- Wrote middleware to handle context propagation in traces for asynchronous, event-based Lambda invocations.
- Built a custom OpenTelemetry collector to receive metric and trace data.
- Architected telemetry pipeline which utilised OpenTelemetry, Promscale (timeseries database), and Grafana.
- Reduced telemetry pipeline set up from over 15 steps to 2 steps using Docker (images, network, docker-compose).
- Designed Grafana dashboards to display serverless function telemetry data using SQL queries.
- Collaborated with a remote team of 4 engineers across 3 countries using agile workflow.
- Authored technical case study on Firefly's development and use case (read the case study here □).

## **Software Engineer,** *Self Employed*

2021 - 2022

- Created open-source applications using various technologies:
  - Gouda Request: Application for viewing and analyzing web hooks (Node.is, Express, Handlebars, Ngrok, PostgreSQL).
  - Airline Routes: Tracks flight paths from airport to airport (React, Node.js, Express, MongoDB).
  - Todo List: Application for creating and tracking customized todo-lists (Ruby, Sinatra, ERB).

#### **NON-TECHNICAL EXPERIENCE**

## **Animal Care,** Animal Rescue Fund of the Hamptons

2014 - 2021

- Coordinated with volunteers and staff to train, rehabilitate, re-home, and save the lives of over 6000 dogs and cats from high-kill shelters, natural disasters, and the illegal food trade in China.
- Phtography: Implemented lighting, set design, and animal posing, in-studio and on set, reducing average time of an animal's shelter stay from 40 days to 13 days

### Sanitation Supervisor, The Beacon

2011 - 2013

Collaborated with front and back of house to deploy new cleaning protocols, increasing patron satisfaction by 11%.

## **SKILLS**

#### Backend

Node.js, Express, Ruby, Sinatra, Golang, PostreSQL, MongoDB, RESTful APIs

## Frontend

JavaScript, React, Redux HTML, CSS, jQuery

### **Tooling**

DigitalOcean, Docker, Git, GitHub, Linux, Bash, OpenTelemetry, Terraform, Grafana, Nginx

## **AWS Services**

Lambda, Cloudwatch, Kinesis, IAM, S3, API Gateway, SQS, SNS, EC2

## **EDUCATION**

#### **Launch School,** Software Engineering

Mastery based education program for Software Engineers: https://launchschool.com/employers ☑

Suffolk County Community College, Business Administration
